

NAHUEL VIERA

Full Stack Developer

*Advanced Computer Science student focused on building robust products. Practical experience developing Full-stack applications (**Angular** / **.NET Core**) and designing scalable architectures (**Monolithic and Microservices**), prioritizing performance, best practices, and continuous deployment. I invite you to visit my **Web Portfolio** (link above) to learn more about my work and explore other projects.*

PROJECTS

TRACKLASS | ACADEMIC TRACKING AND MANAGEMENT PLATFORM – PERSONAL PROJECT

2026

📁 Angular 18 - .NET Core 8 - PostgreSQL - Angular Material
🔗 [tracklass-five.vercel.app/dashboard](#)

SaaS-style web application designed for student organization, activity tracking, and financial control for private tutoring.

- Designed a REST API using **Layered Architecture**, isolating business logic to ensure system maintainability and scalability.
- Resource Optimization (Client-Side Rendering)**: Delegated PDF and Excel report generation to the browser (Angular) to prevent backend CPU and memory overload.
- Developed an analytical engine with **PostgreSQL** persistence to dynamically consolidate real income and track pending debts.
- Built a responsive user interface using **Angular Material** and implemented direct notifications via WhatsApp.

E-COMMERCE MICROSERVICES | DISTRIBUTED PLATFORM – PERSONAL PROJECT

2026

📁 .NET 10 - Angular - PostgreSQL - YARP API Gateway - Docker
🔗 [ecommerce-microservices-ow4d.onrender.com/](#)

Full-stack e-commerce application based on an 8-independent-microservices architecture, focused on resilience and scalability.

- Implemented the **Saga Pattern** to ensure consistent distributed transactions during checkout, coordinating services without tight coupling.
- Managed traffic routing and centralized security using **YARP** as an API Gateway for JWT token validation.
- Applied a *Database-per-service* design using PostgreSQL to isolate dependencies, with a unified cloud deployment (Render, Neon) using **Docker**.
- Validated critical business logic and system integrations by implementing automated tests with **xUnit**.

SKILLS

- Backend: **ASP.NET Core**, **Entity Framework Core**, **REST APIs**
- Databases: **SQL Server**, **PostgreSQL**
- DevOps/Herramientas: **Git**, **Docker (basic)**, **Azure (basic)**, **Swagger**, **Vercel**, **Render**, **Neon**, **Power BI**.
- Frontend: **Angular**, **Angular Material**, **Bootstrap**, **Tailwind CSS**
- Languages: **C#**, **TypeScript**, **JavaScript**, **HTML**, **CSS**
- Testing: **xUnit + Moq** (pruebas unitarias) y testing básico de APIs en **ASP.NET Core**

EDUCATION

BACHELOR'S DEGREE IN COMPUTER SCIENCE (IN PROGRESS)

2022 – Present

Universidad de la Empresa (UDE) | Thesis in progress.

Complementary Training: Foundational C# with Microsoft (freeCodeCamp)

LANGUAGES

- English: B2 – Certificate of Competency in English (ECCE), Michigan
- Spanish: Native Language Assessment
